Sublingual tinctures provide patients with a simple and quick dosing method that doesn't involve combustion or consuming sweet confections. Each of our four distinct formulas are a mixture of isolated cannabinoids, cannabis-derived terpenes, and a blend of homeopathic herbs to achieve a range of desired effects.

**Propel:** An energetic Sativa based formula designed for patients with an active lifestyle. Containing humulene (also found in hops), b-caryophyllene, limonene and a Super Lemon Haze terpene profile, Propel is best suited for energetic patients on the go.

**Harmonize:** Utilizing a 4:1 ratio of CBD to THC, Harmonize is designed for focus and relaxation. Perfect for yoga, meditation, and overall wellness, this unique blend contains myrcene, caryophyllene, linalool, limonene, pinene, and a Harlequin strain terpene profile.

**Quench:** A straightforward 1:1 THC/CBD ratio created to add a splash of fun and excitement to any situation. Perfect for socializing with friends, creative endeavors, or a round of golf where some have found it to be the ultimate "swing oil." This MXR contains orange essential oils, pinene, limonene, and a Sour Diesel strain terpene profile.

**Sleep:** It's something we can't live without, and so is this dreamy potion. A robust dose of CBN (sleep inducing) makes this tincture a must have for restless nights staring at the alarm clock. Packed with Ylang Ylang, lavender essential oil, and a Blue Dream strain profile, there's no better way to get some shut eye.
