AZUCA POWERED FOR FAST-ACTING EFFECTS

Formulated for a much quicker onset of 2-15 minutes compared to the standard hour or more of traditional infusions.

How it works: Traditional oil-based edibles are processed by the liver, making it impossible, due to variabilities in liver function, to have a predictable experience.

TiME INFUSION™ creates a unique thermodynamic matrix of individually encapsulated cannabinoid molecules, resulting in a hydrophilic, or water-friendly ingredient. This hydrophilic technology bypasses that lengthy trip through the liver, and instead absorbs directly into the soft tissues of the mouth, esophagus, and stomach to reach your endocannabinoid receptors quickly and efficiently. This allows these high-quality cannabinoids to take effect in a groundbreaking, consistent, and predictable two to fifteen minutes.

**CANNABINOID INGREDIENTS HAVE PROBLEMS.
AZUCA TiME INFUSION™ SOLVES THEM.**
